### Abstract:

The fact that hypnotized individuals with sleeping Conscious calculate much faster means that we have a more powerful Computer in the Subconscious. It is a Quantum Computer because it works with the waves of our biofield seen as aura, which I found to be nonlinear electromagnetic field (NEMF). All NEMF do not dissipate and can imprint information. If so, the biofield (aura) NEMF could be used for learning new information. This explains the miraculous effortless learning of foreign languages during sleep. It is done through the Quantum Computer in the Subconscious (active during deep sleep), which works with the waves of the biofield (aura) NEMF. Now, in the 21st century, when we started making Quantum Computers working with informational field, we need to start using the informational field (NEMF) of our Quantum Computer in the Subconscious for learning – not necessarily during sleep, but using the specific characteristics of the Quantum Computer in the Subconscious.

**Key Words:** learning; Subconscious learning; Subconscious Quantum Computer; learning through our Quantum Computer.

## Introduction

Hypnotists found with surprise that hypnotized individuals with sleeping Conscious could calculate at least 10,000 times faster. This means that in the Subconscious we have a more powerful Computer than the Conscious Computer on the surface of the brain. My lifelong studies of the biofield (seen as aura) showed that the aura is brighter at positive emotions and dimmer at negative emotions. Since we say that we are in high Spirit when experiencing positive emotions, and we say we are in low Spirit when experiencing negative emotions, I concluded that the aura

must be our Spirit. Then I found that the ancient Jewish Cabala was teaching to high priests that the aura is our Spirit – aura (Spirit).

Now, when we started building Quantum Computers, it is high time to acknowledge the fact that we have a Quantum Computer in the Subconscious, working with the waves of the emotional aura (Spirit) [1], [2]. My lifelong studies of the aura (Spirit) found that it is nonlinear electromagnetic field (NEMF), which being nonlinear does not dissipate and can imprint information [3]. Presently, we are using the Digital Computer in our Conscious for learning, but since the Quantum Computer in our Subconscious (working with the waves of the informational NEMF of the aura (Spirit)) is much faster and has a huge storage capacity, I believe that in the 21<sup>st</sup> century, we will use the powerful Quantum Computer in our Subconscious for learning.

### **1. Our Sleep Is a Constant Switch between Light Sleep When the Conscious Is Active and Deep Sleep When the Subconscious Is Active**

Our sleep is a constant switch between light sleep (when EEG measurement shows that the Conscious on the surface of the brain is active (which is our Digital Computer) and deep sleep when deep conscious areas of the brain are active. Since our emotional brain is buried in the deep areas of the brain called the Subconscious - only galvanic response is measured during deep sleep, which is typical for emotional response. These constant switches (light sleep) <-> (deep sleep) seem to be reading the information recorded during the day in the Conscious Digital Computer (active during light sleep) and sending this information for a permanent storage in the Quantum Computer in the Subconscious (active during deep sleep). This explains why the courses for effortless learning of foreign languages during sleep are so successful. It is because the memorizing is done by the Quantum Computer in the Subconscious, which is active during deep sleep.

### **2. Learning Foreign Languages during Sleep**

More than 50 years ago, Dr. Lazarov in the country of Bulgaria, offered courses for effortless learning of foreign languages during sleep. It was intuitive insight (he could not explain how it works), but his experimental courses for learning foreign languages during sleep were a success. Sugestopedial Institute was created to find scientific explanation how this works, but no explanation was found. Now, when we started making Quantum Computers, and knowing that hypnotized individuals with sleeping Conscious can calculate much faster, I claim that we have a powerful Computer in the Subconscious [1], [2]. It is a Quantum Computer because it works with the waves of the aura (Spirit) NEMF, which (being nonlinear field) does not dissipate and can imprint information. If so, the effortless learning of foreign languages during sleep is done through the powerful Quantum Computer in the Subconscious, which is active during deep sleep and can imprint new information.

### **3. In the 21<sup>st</sup> Century, We Will Learn Subconscious Learning, which Is Easy and Fun**

We can learn in the way we learn foreign languages. Even we can offer during sleep all the knowledge achieved by our civilization. However, the Sugestopedial Institute in Sofia, Bulgaria, in their experimental school offered a different approach. They were teaching during the day and using other specific features of the subconscious learning. The success of this school proved the success of their approach. My son attended the Experimental School with Subconscious Learning. In first grade, the first half of the year they took addition and subtraction and equations with addition and subtraction, and the second half of the year multiplication and division and equations with multiplication and division. Nobody complained that mathematics is difficult - it was easy and fun. I still have his first-grade math-book, which proves that math could be made fun. I need to write another article explaining scientifically the details. Now, based on what we have learned about Quantum Computers working with informational fields, I can explain scientifically the roots of the success of the School with Subconscious Learning, which uses the powerful Quantum Computer in the Subconscious for learning.

### **4. Conclusion**

Thus, the fact that hypnotized individuals with sleeping Conscious calculate much faster means that we have a more powerful computer in the Subconscious [1], [2], than our Conscious Computer on the surface of the brain. The

Subconscious Computer is a Quantum Computer, which works with the waves of the aura (Spirit) informational NEMF. Since the aura (Spirit) NEMF is informational, it could be used for memorizing new information and learning. This explains the success of effortless learning of foreign languages during sleep when the Subconscious and its Quantum Computer are active. It also explains the success of the experimental School with Subconscious Learning, whose curriculum is based on the specific characteristics of the Subconscious Quantum Computer.
